

The Sixth Annual Watershed Conference

CALL FOR POSTERS!

Event Details

February 10 & 17, 2023 | 10 a.m. - 5 p.m.

Hybrid (In-Person and Virtual Options)

Physical Address: 31 Titus Mill Road, Pennington NJ

Event Contact: Pri Oliveira (poliveira@thewatershed.org)

The Watershed Conference is an opportunity for learning, brainstorming, discussing, and planning solutions to the problems facing New Jersey's watersheds.

In 2023, the conference will focus on updates to the Municipal Separate Storm Sewer System (MS4) permit in New Jersey, regional solutions to address polluted stormwater runoff and flooding, environmental justice, and the need for community-wide action.

Poster Session (Feb. 10 @ 4 p.m.) ✨ **SUBMISSION DEADLINE: FEB. 6** ✨

The poster session is a great opportunity for presenters to engage field professionals, local leaders, and community members with their efforts and projects. We invite all who are interested in showcasing their work or a local project that...

- Seeks to better understand an environmental issue related to watersheds (i.e., plastics and microplastics, flooding, erosion, contamination, water quality, etc.)
- Highlights a green and/or nature-based solution to the issues
- Explores an example of current or past local advocacy

We encourage those who wish to participate to bring their poster to the Watershed Center on the morning of or before Feb. 10 so that posters can be displayed throughout the entire day of the conference.

If you are interested in displaying at the poster session, please contact us at poliveira@thewatershed.org by Feb. 6 with brief answers to the following questions:

- **What is the main topic of your poster?** Please provide a short summary. If it was a research study, please provide your hypothesis and results.
- How does your main topic or study relate to watershed-related issues, solutions, and/or advocacy?

Interested in attending the whole conference? You can register and find scholarships on our website: thewatershed.org/conference
